CECILIE MANZ INTRODUCING ATMOSPHERE

# ATMOSPHERE

Depending on your perspective, the word 'atmosphere' can conjure up a variety of emotions. The freedom to move, to enjoy independence or intimate moments - to be at one, whether alone or with those closest to you. But atmosphere also buzzes with chatter and laughter and dancing light - the sound of good times amongst family and friends.

# ATMOSPHERE

## BY CECILIE MANZ

For the Gloster Atmosphere collection, Danish designer Cecilie Manz has drawn from observing couples, groups, friends and families interacting in seating areas - sliding down low in comfortable furniture, tucking up legs, resting side by side as stories are told and moments are shared.

"This is why it felt natural" Cecilie says, "to lower the whole setting, to enhance and welcome this feeling of comfort and quiet - when you wish to have slightly more relaxed moments, even a few centimetres in height makes a significant difference. Sitting lower pulls you into a familiar, soothing embrace - welcoming you to unwind and stay longer."

Cecilie says "The materials in a project should reflect the usage of the pieces. Aluminium and teak are great materials for outdoor spaces, the finish of the metal is robust, and the solid teak gets a beautiful grey patina over time. Combined with the fabric options, the palette is subtle and harmonious, revolving around muted, sophisticated tones.

Cecilie has intuitively embraced the emotions behind the design in a powerful mixture of minimal, powder coated aluminium frames, generous boards of Gloster's signature teak and cleverly designed self-supporting upholstered panels.

When asked if she can summarise her collection Cecilie smiles before answering; "It's quite simple really... the name is a reflection of the situation. It's all about creating atmosphere.

# FABRICS

Express your individual personality by choosing from our wide range of Sunbrella® performance outdoor fabrics. From solids, to patterns, waterproof to knitted textures, there's a fabric to suit every style and application – all featuring unmatched durability, fade resistance, and ease of cleaning.

# GLOSTER FABRICS

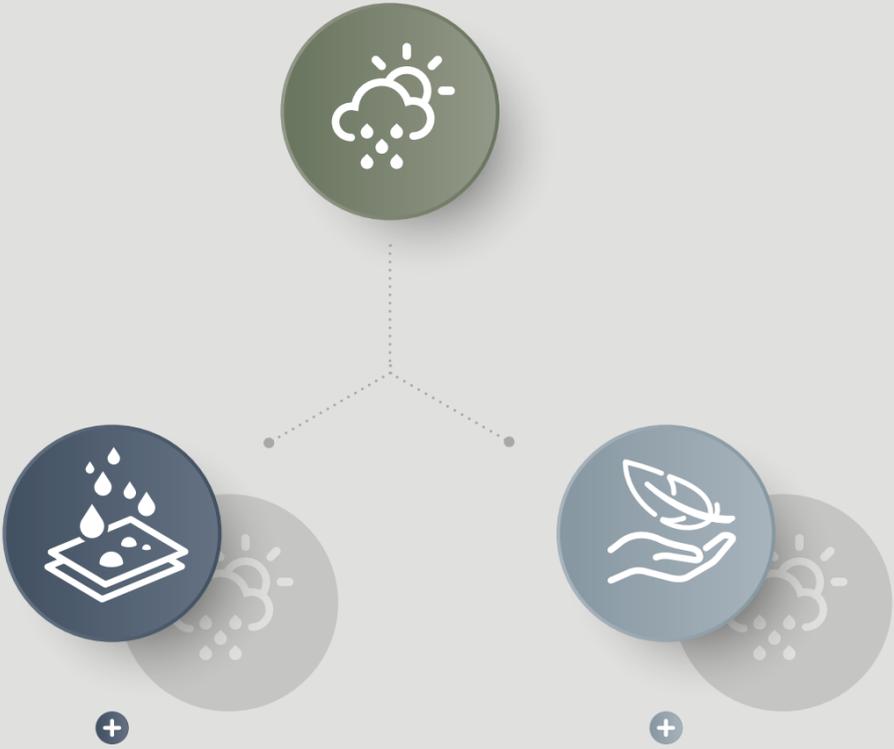

No matter which type of fabric you choose for your cushions, Gloster only use the best outdoor fabrics that are manufactured using 100% solution dyed acrylic yarns for maximum resistance to the fading and degrading effects of sunlight. All fabrics are finished with a water-repellent

coating on the surface to reduce water absorbency. If the fabric does become wet from prolonged exposure, they will come to no harm, and the fabrics will dry out naturally. Gloster cushions are offered with fabrics that fall into three distinct groups:

## OUTDOOR PERFORMANCE

Offered in a wide selection of stylish and sophisticated fabrics with a soft hand, our Outdoor Performance cushions use the softest, most luxurious fillings that give

the feel of the most comfortable indoor furniture. A highly water-resistant barrier beneath the outer fabric cover protects the fillings, keeping drying times to a minimum.

### MAXIMUM WATER RESISTANCE

For maximum water resistance, a selection of Sunbrella® Rain cover fabrics features a water-resistant coating that is applied to the back face, helping prevent water travelling beyond the surface of the fabric. Although not offering quite the same soft hand as our other fabrics, these water resistant fabrics are very practical and quick drying. The fillings inside the cushion are engineered using open cell materials to allow for maximum air circulation, helping to speed up the drying process even further.

### MAXIMUM SOFT TOUCH

Combining with all the benefits present in Outdoor Performance cushions, Gloster offer this range of exclusive, knitted outdoor fabrics, the first to be produced using 100% solution dyed acrylic yarns. These knitted fabrics offer the ultimate in terms of softness, giving a sumptuous cosy feel, while the inherent stretch allows for the perfect fit to even the most demanding of cushion shapes. The Wave fabrics feature a unique, 3D knitted structure giving levels of texture and softness unparalleled in outdoor fabrics.
